Viewership Analytics

Strategic Insights to Drive Subscription Growth

Presentation Outline

WHAT WE WILL COVER TODAY

01

Executive Summary

Key numbers at a glance

02

User & Usage Trends

Who is watching and when

03

Content Consumption

What drives viewing time

04

Demographic Deep-Dive

Age, gender, geography

05

Gender & Race Viewership

Who views most & the gaps

06

Data Quality

Profile completeness & CVM opportunity

07

Factors Influencing Consumption

Peak hours & engagement depth

08

What Drives Extended Viewing?

Top channels by minutes

09

Low-Day Strategy

What to programme on slow days

10

Growth: Acquisition

Sports, female, youth initiatives

11

Growth: Retention

Notifications, binge, loyalty

12

Gender & Race Targeting

How to reach underserved segments

13

Conclusion & Next Steps

Priorities and actions

Executive Summary

KEY METRICS AT A GLANCE

5,375

Unique Subscribers

10,989

Total Viewing Sessions

8.7 min

Avg Session Duration

~87K min

Total Viewing Minutes

80%

Sessions by Males

50%

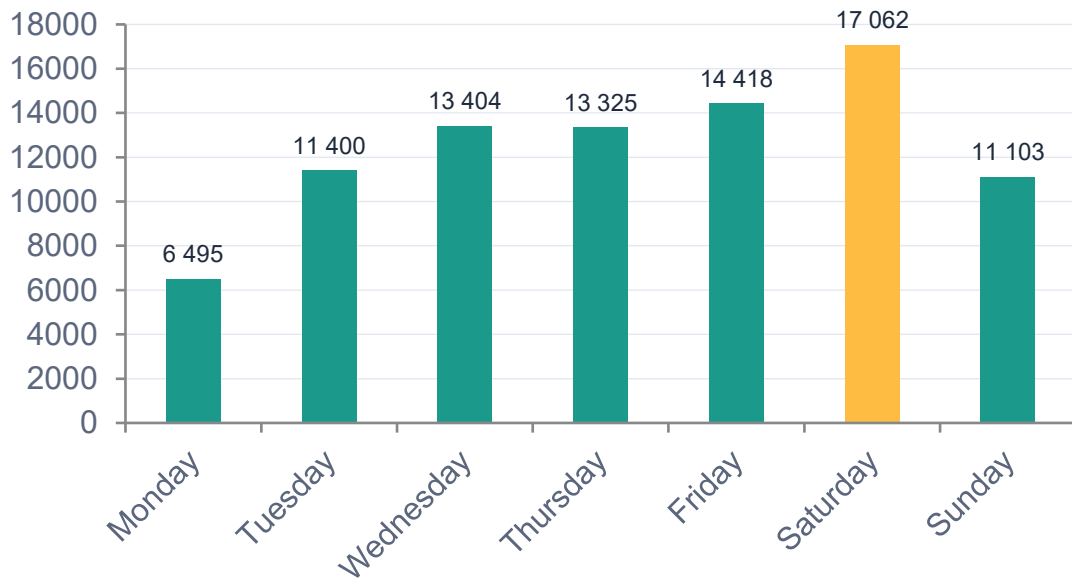

Sessions: Young Adults

Sports dominates — 54% of total minutes. Mon & Sun are lowest engagement days — biggest growth opportunity.

User & Usage Trends

SESSIONS & VIEWING BEHAVIOUR BY DAY

Viewing Minutes by Day of Week

Saturday leads

17,062 mins — highest day by volume.

Monday is lowest

6,495 mins — 22% below weekly average.

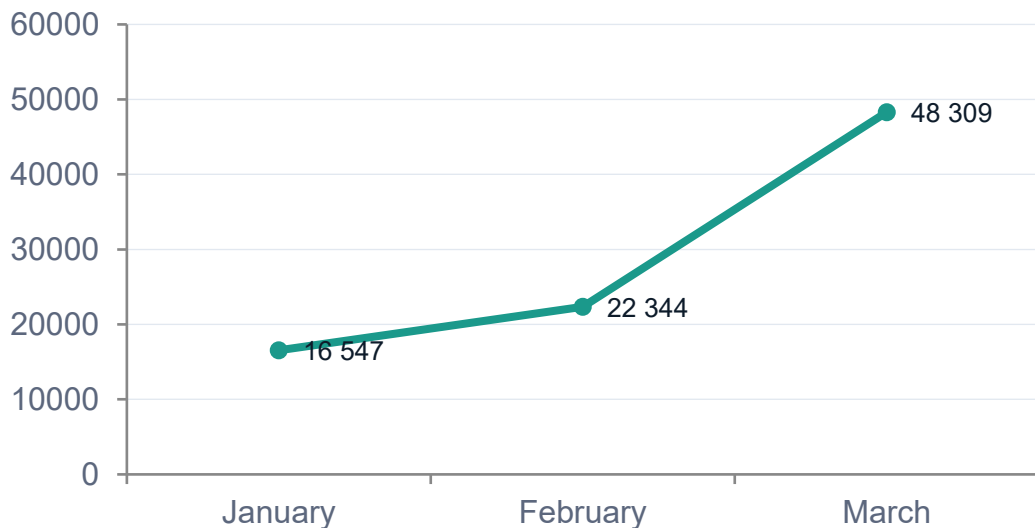

Weekends avg 9.2 min/session

vs 8.5 min on weekdays — viewers linger longer.

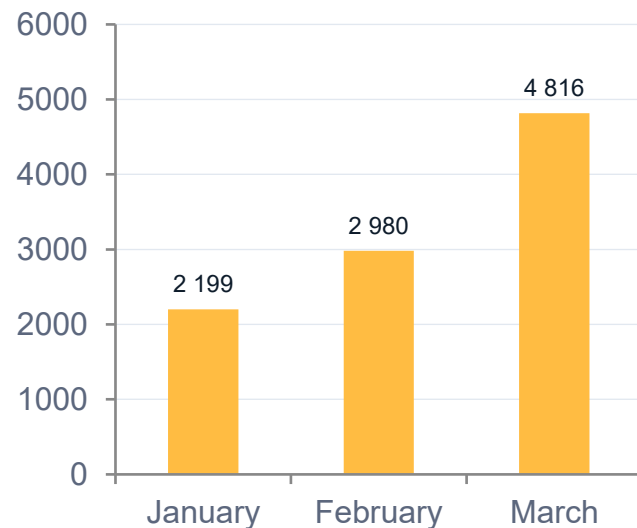

Monthly Viewing Trends

GROWTH TRAJECTORY ACROSS Q1

Total Viewing Minutes: Jan–Mar

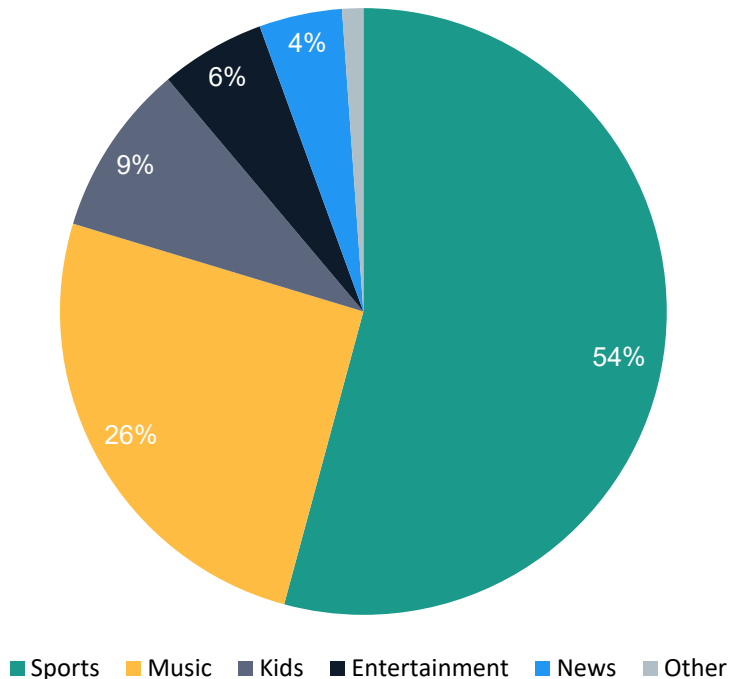

Sessions by Month

March saw a 116% jump in viewing minutes over January — driven by ICC Cricket World Cup. Live sports events are a major consumption catalyst.

Content Consumption by Category

WHAT SUBSCRIBERS ARE WATCHING

Sports

47,272 min | 54%

Music

22,211 min | 25%

Kids

8,012 min | 9%

Entertainment

4,872 min | 6%

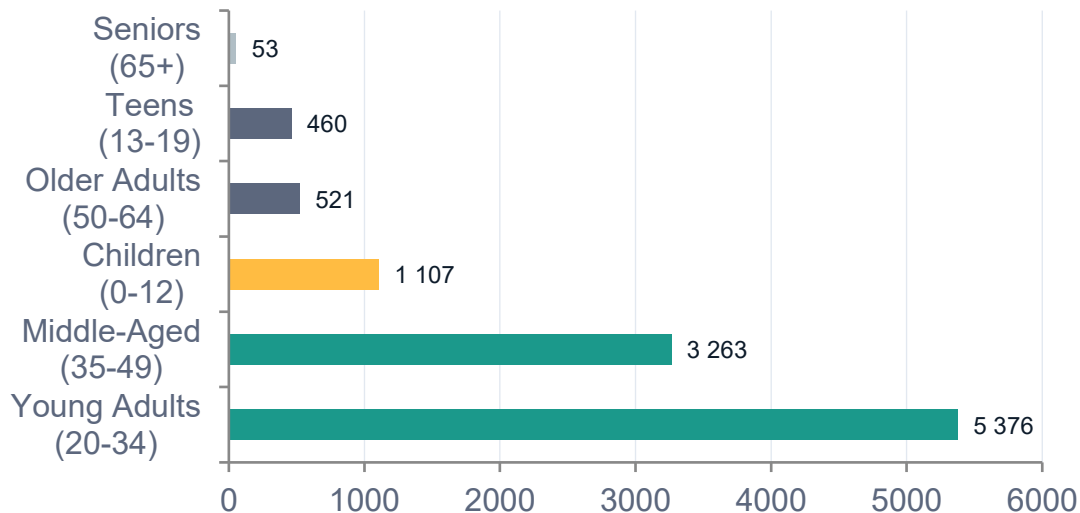

News

3,856 min | 4%

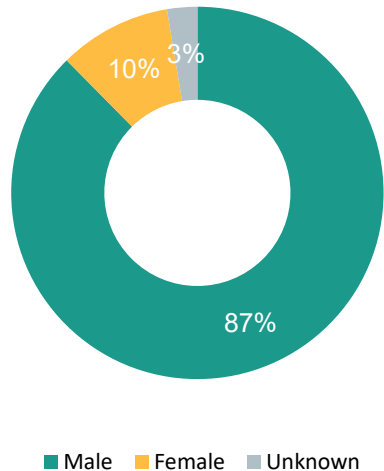

Demographic Deep-Dive

WHO IS WATCHING BRIGHTTV

Sessions by Age Group

Gender Split

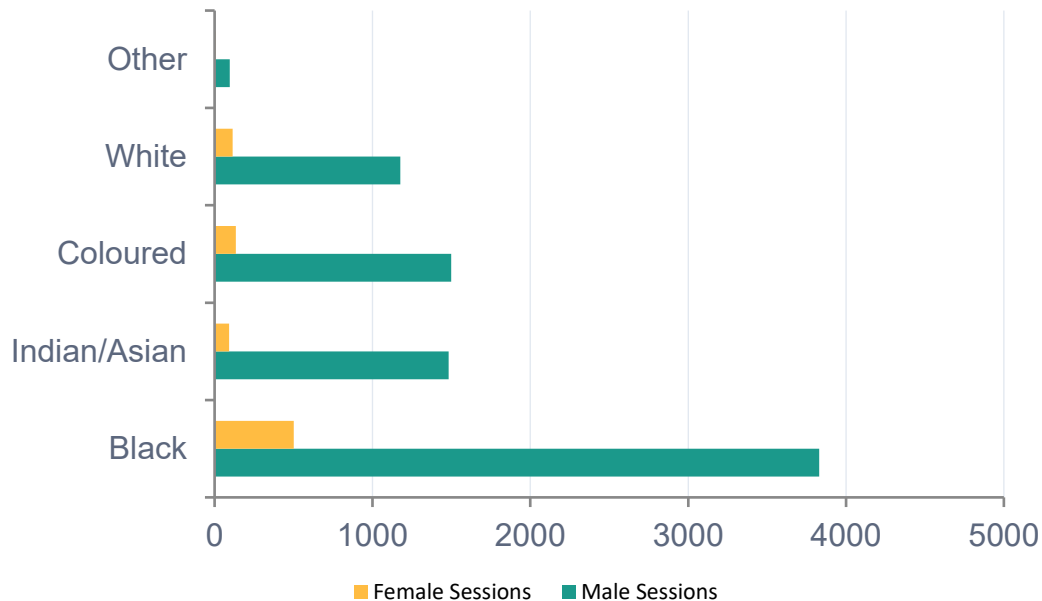

80% of viewers are male. Young Adults (20-34) are 50% of sessions. Middle-Aged 30%. Female viewership across all groups is under 10% — a clear growth opportunity.

Gender & Race Viewership Deep-Dive

WHO WATCHES THE MOST — AND WHERE THE GAPS ARE

Sessions by Race & Gender

Black males dominate

3,830 sessions — the largest single viewing group on the platform.

Indian/Asian males watch longest

13.2 min avg per session — highest engagement depth of any group.

Female viewership ~10% overall

Across every race group, women account for fewer than 1 in 10 sessions.

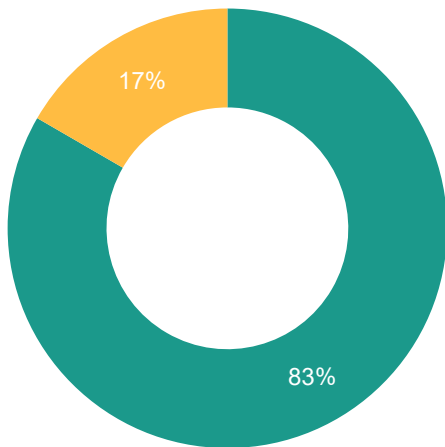

Indian/Asian women most underserved

Only 5.9% female within that group — biggest gap vs their male counterparts.

Data Quality & Profile Completeness

WHAT WE DON'T KNOW — AND WHY IT COSTS US

Data Session Completeness

■ Complete Sessions (83.4%) ■ Incomplete Sessions (16.6%)

Missing Data by Field

16.6%

Race / Ethnicity

24.4% of users unidentifiable for ethnic targeting

1,828 sessions

13.9%

Channel Category

984 mins of viewing time unattributable

1,523 sessions

9.2%

Province

920 users cannot be geo-targeted

1,007 sessions

9.2%

Gender

920 users excluded from gender-based campaigns

1,007 sessions

9.1%

Age (recorded as 0)

Likely incomplete onboarding — age group unknown

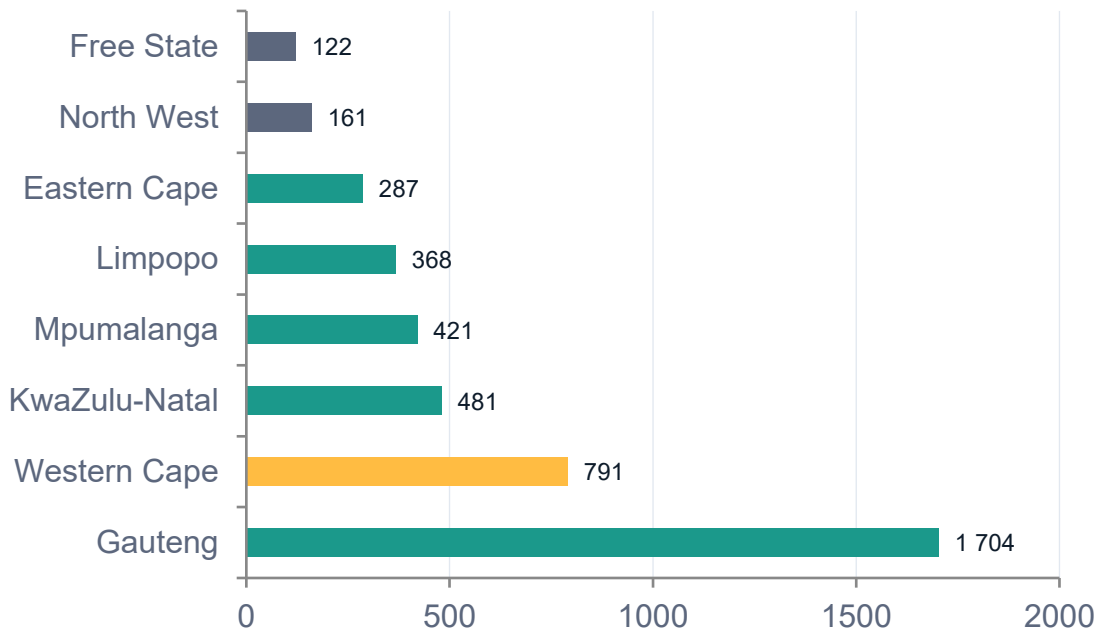

1,005 sessions

CVM Opportunity: A targeted profile-completion campaign could unlock personalisation for ~1,800 sessions per cycle, enabling fuller data collection.

Geographic Distribution

WHERE SUBSCRIBERS ARE LOCATED

Unique Subscribers by Province

Gauteng dominates

1,704 unique users — 32% of identified subscribers.
High urban density = high potential.

Western Cape is #2

791 users. Strong Cape Town metro penetration.

Emerging markets

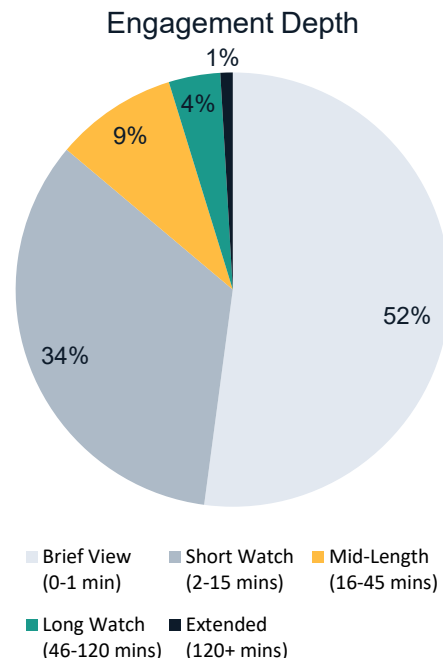

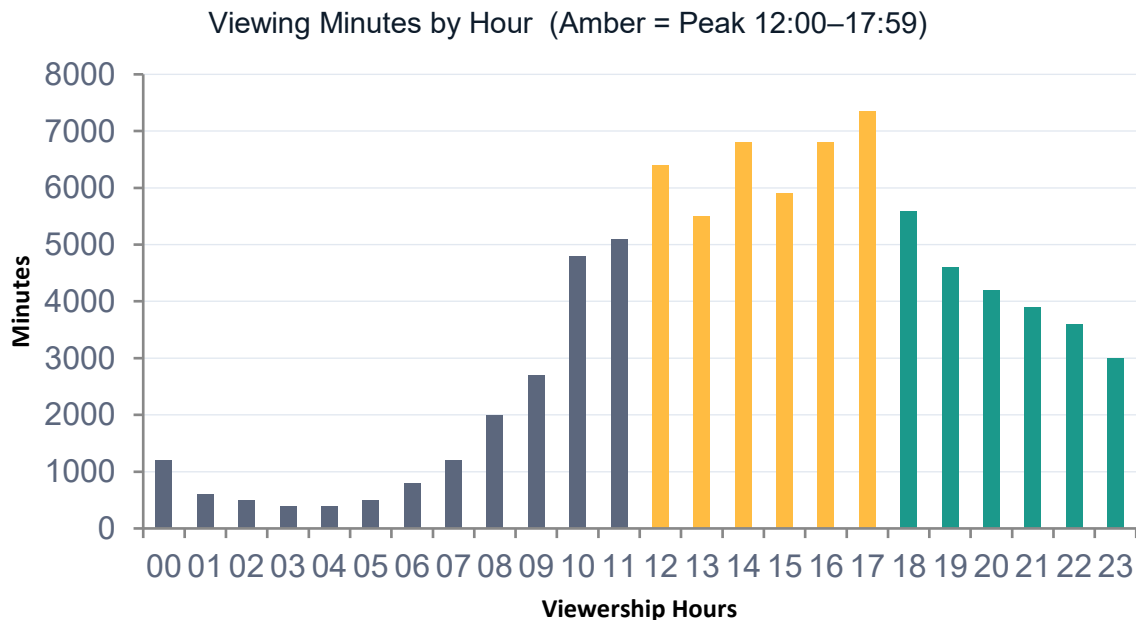

Mpumalanga & Limpopo together: 789 users — rural growth frontier.

Female subscribers

Most female viewers are in Gauteng & Western Cape — target digital campaigns there.

Factors Influencing Consumption

PEAK VIEWING HOURS & ENGAGEMENT DEPTH

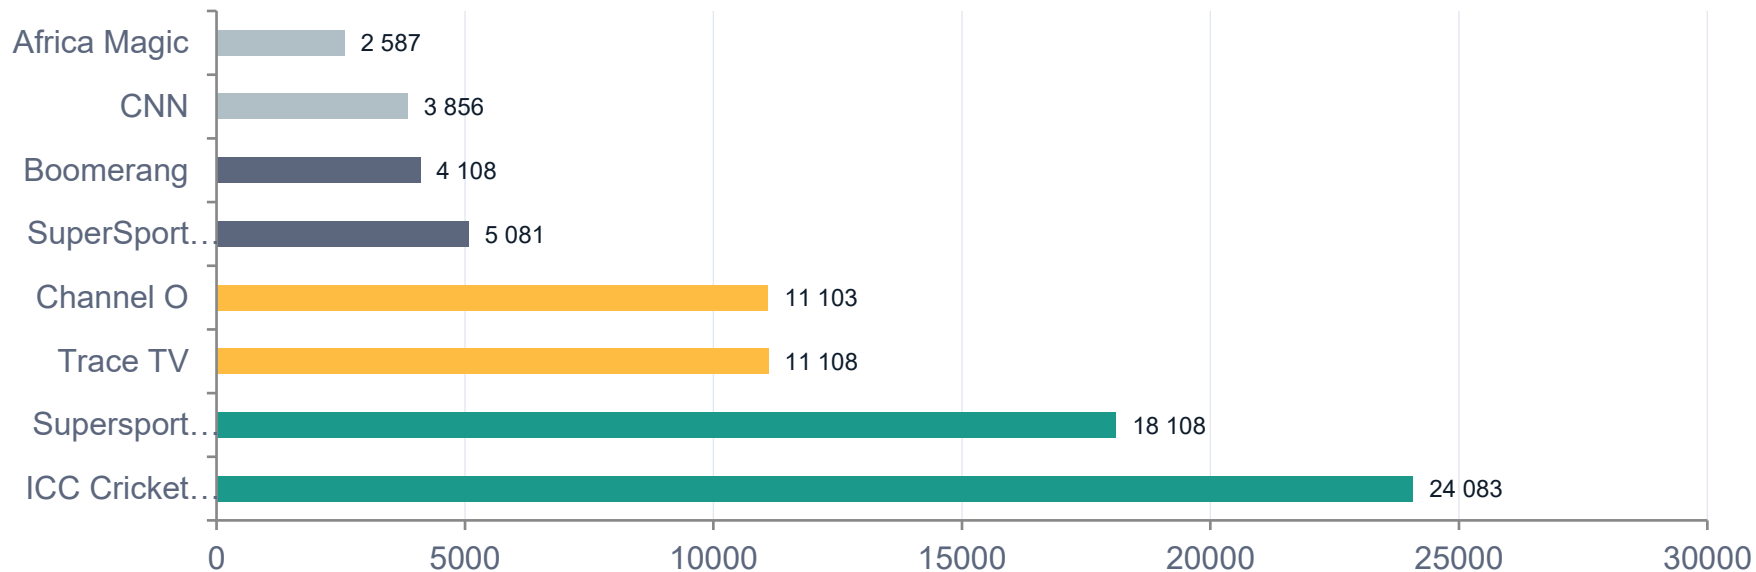

Peak window: 12:00–18:00. 47% of sessions are brief channel-surfing views under 1 min — high churn at the top of the funnel. Schedule anchor content in the afternoon to convert browsers into watchers.

What Drives Extended Viewing?

CONTENT TYPE & CHANNEL PERFORMANCE

Top Channels by Total Viewing Minutes

Live sports (Cricket + Supersport) = nearly 50% of all viewing time. Music channels (Trace TV + Channel O) = 25%. These are BrightTV's two anchor content pillars.

Low Consumption Days: Content Strategy

WHAT TO PROGRAMME ON MONDAY & SUNDAY

MONDAY

Lowest day: only 6,495 mins (23% below avg)

🎵 Music shows & countdowns — Mon is #1 music viewing day

📺 Short-form entertainment (comedy, reality): 6–8 pm slot

🎯 Subscriber-exclusive premiers on Mondays to drive logins

📱 Push notifications to re-engage inactive Mon subscribers

SUNDAY

Second weakest: 11,103 mins — missed opportunity pre-week

🏆 Sports previews / highlights for upcoming week fixtures

👨👩👦 Family content (Kids + Entertainment): afternoon 12–16h slot

🎬 Feature-length content (movies, documentaries): evening 18h+

🔔 'Sunday Binge' campaign to drive extended session lengths

Growth Initiatives — Acquisition

STRATEGIES TO GROW BRIGHTTV'S SUBSCRIBER BASE

01

Female-Targeted Content Expansion

Only ~10% of sessions are female. Launch reality TV, lifestyle, drama and women's sports programming. Partner with Africa Magic and E! for branded content.

02

Expand into Emerging Provinces

Mpumalanga and Limpopo show strong engagement but low subscriber counts. Local-language programming and rural data partnerships could accelerate penetration.

03

Live Sports as Acquisition Engine

ICC Cricket caused a 116% viewing surge. Secure exclusive live sports rights (PSL, rugby, tennis) and use them as sign-up triggers with trial offers during event windows.

04

Youth & Teen Conversion Programme

Teens (13–19) are only 4% of sessions but a future core demographic. Introduce a Youth tier with gaming, animation, and eSports content.

Growth Initiatives — Retention & Engagement

KEEPING SUBSCRIBERS ACTIVE & WATCHING LONGER

Personalised Push Notifications

47% of sessions are brief views under 1 minute — subscribers are browsing but not staying. Use viewing history to send personalised content reminders at peak times (12:00–18:00).

Binge-Trigger Programming

Only 1% of sessions are Extended Watch (120+ min). Create 'marathon weekends' around live cricket and music countdown shows to cultivate longer session habits.

Loyalty & Rewards Programme

Introduce streak rewards for daily login, referral bonuses, and exclusive content unlocks for long-tenure subscribers. Gamification improves retention in streaming.

CVM Micro-Segmentation

Build 5 CVM segments based on age-content affinity: Sports Males 20-49, Music Youth, Kids Parents, News Professionals, and Female Entertainment. Target each with relevant content.

Conclusion & Next Steps

PRIORITIES FOR THE CVM TEAM

Sports is the growth engine

Invest in exclusive live sports rights — ICC Cricket caused a 116% viewing spike. Every major event is a subscriber acquisition window.

Female viewers = untapped market

80% of sessions are male. A dedicated female content strategy could double the addressable audience.

Monday & Sunday need programming love

These are the lowest consumption days. Targeted content scheduling and push campaigns can lift them to weekly average.

Afternoon slot is prime time

12:00–18:00 is the peak viewing window. Schedule highest-value content here, not in the evening.

Thank You
